

Global Migration Services for Life Sciences

Benefit from our content migration expertise across all leading content services platforms

Depending on the specific business use case, a migration project can turn into a highly complex process. In addition to the technical aspects that have to be taken into consideration, the project management and communication within the enterprise often becomes a challenge as multiple departments are impacted by changes. Leverage these success factors by engaging our fme Life Sciences migration services team to manage your project successfully.

The Challenge of Migration Projects

Complexities and challenges go hand in hand depending on the specific type of migration project. Knowing the state of data and understanding what needs to be done to support your migration effort are keys to success for any endeavor. The fme Life Sciences migration services team helps you overcome those challenges by providing you with the appropriate guidance, knowledge of industry-leading software platforms, and deep domain expertise.

- Deliver responsive client management to ensure proper communication across workstreams
- Clearly identify who defines transformation rules and overall mappings
- Verify that all validation and reporting requirements are stringently met to ensure compliance

In addition to these capabilities, our migration services team will ensure you have the right people with the right skills available to achieve our common goal for success. By having the right people aligned, we can also ensure that the downtime for your targeted system is kept to a minimum. This reduces the overall costs for the project and gets your organization to your new environment as quickly and efficiently, as possible.

How Global Migration Services Supports Your Organization

The fme Life Sciences Migration Services team supports global clients with migration project services utilizing the fme migration-center product. Whether you need support in a specific business area, or you require support to take care of your entire migration project in a full service agreement, our team is equipped to deliver the highest quality results.

The team at your hand consists of software developers, project managers, migration specialists and communication experts. Through our best-practice-based methodologies, market-leading software and tools and the experienced professionals in fme Centers of Excellence in the US and Europe, we provide high-quality outcomes, while always keeping an eye on cost management.

To provide support for our clients in many different countries with optimized quality/cost resource combinations, the fme Centers of Excellence are regionally located. Many leading Global Life Sciences organizations have benefited from our experience with migration projects for leading technology platform vendors.

Quality Assurance

While migrating, it is important to verify that all migrated content arrives in the target system by means of quality and quantity. Therefore, a strong methodology around quality assessment is key to ensure even greater success with the content and metadata in scope for migration.

- Development of black box test strategy
- Creation and adaptation of QA documents and reports
- Definition of representative sample sets
- Data Quality Assessment Report for review of the state of the content in scope for migration

Content & Data Consolidation and Cleansing

The proliferation of mergers and acquisitions in the industry means companies must invest in programs to consolidate and cleanse data and content in order to ensure quality and integrity. Our team supports this process through our understanding of both the data management and technical requirements to consolidate, archive, and migrate data and content from different databases and organizations to cloud-based platforms.

fme's migration-center is a content migration platform, which carries out highly automated, large volume migrations without system downtime. It is a 100 % out-of-the-box software, fully documented, easy to deploy, and with an intuitive graphical user interface. Save 60 % in costs and 80 % in project duration time when using migration-center compared to developing your own scripts and frameworks. The product is on the market since 2005 and has been certified by leading ECM vendors. migration-center has proven its quality in thousands of migration projects around the world, even in highly regulated environments. Whenever and wherever required, it works efficiently in the background without interrupting any of your normal business operations. The market leading product has the power to classify objects through extensible algorithms with no additional programming or scripting effort needed. Together with our international partners we offer a global service presence to support you with your migration project or simply train you on our product.
