

Migration Services Assessment

Complimentary workshop to determine your migration needs

Free
of charge*

Data migrations are a critical and integral component of a system transition or merger, but are often the cause of project failure. If you are preparing to migrate your enterprise data or content, fme's experience, knowledge and proprietary migration-center software will minimize the risk of unexpected obstacles to your project success. Take advantage of our complimentary migration services assessment and let us provide valuable insights into your specific migration needs and data.

Our Migration Services Assessment allows companies to gain real insight into the complexities and costs of their planned migration activities. In a focused, collaborative workshop, our experts will work with your team to uncover the possibilities and pitfalls of your migration needs and present you with a high-level timeline and budget range for your project. Our assessment includes discussion on your source and target repositories, the migration approach, and data quality, verification and enrichment strategies.

Most of our workshop engagements incorporate the concept of using our migration-center software, which supports all major platforms including Veeva Vault, OpenText D2, Sparta Trackwise Digital DMS, Generis CARA, SharePoint and many others.

Benefits

- Minimize the risk of initiating a project without a clear understanding of the benefits and potential challenges
- Educate your project team on the necessary considerations and activities in order to optimize the project deliverables
- Learn about the process and business rules that can be applied to enrich your document metadata
- Identify other application areas where our migration-center software and migration services expertise can benefit your content management activities
- Provide your business leadership with a high-level timeline and budget for the migration project

fme Migration Services Assessment includes

- A focused, collaborative workshop with our consulting and technical migration experts
- Full documentation of workshop materials including high-level timeline, budgeting data and preliminary risk assessment
- Free evaluation copy of **migration-center** for two weeks
- Product support for the whole test period

Migration assessment agenda

Part 1
